INDICATOR LIGHTS INSTRUCTION

Red breathing light indicates power connection

Blue breathing light indicates the car is connected to the smart phone App and ready for control

Wi-Fi Antenna

Camera Lens

Led Headlights

When the car is charging and standby, the seven rear lights indicate its power level. When the car is connected to the smart phone App, the rear lights black out. When the car is turning, the rear lights indicate the car's moving direction.

Charger Jack

Power Switch

Reset，Reset Button for Factory Reset and Easy Configure

* Turn the power switch on, wait 40 seconds for the car to boot initialization. When the blue breathing light on top of the car flash one or two times, it means the car is ready for use.
* Note: If the flashing rear lights are less than 3, please recharge the car before using.
* Instruction of the "Reset" button at the bottom of the car When the car is power on, long press the "Reset" button with something sharp for 10 seconds can restore its factory setting. This is often used to disconnect the established link between the Cloud Companion and the router and restore the car's default password. Short press the "Reset" button for 1 second will easy-configure the car with the smart phone.
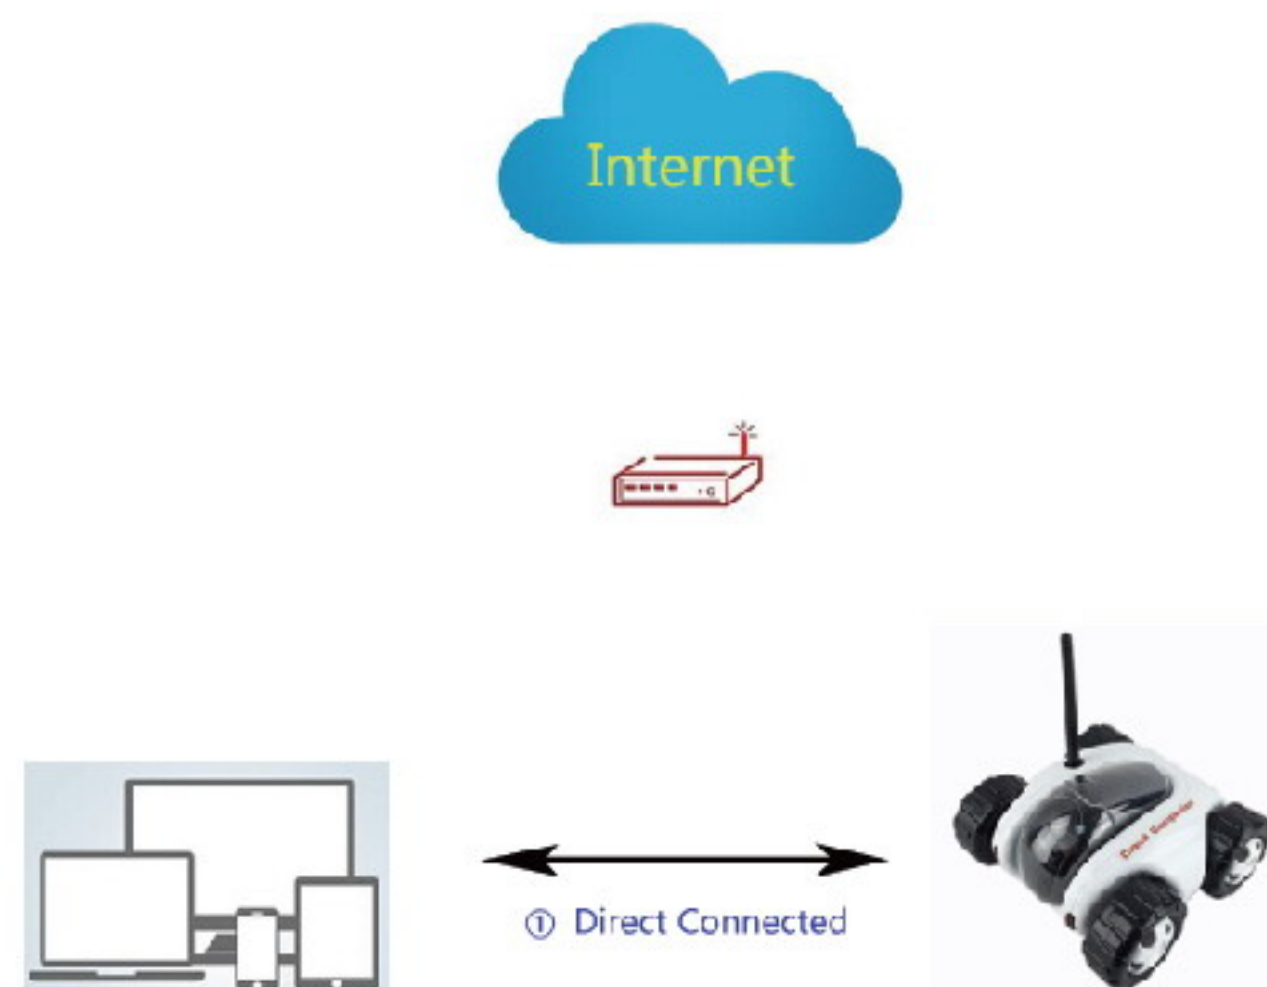

Cloud Companion User Guide:

The above shows three ways to connect your Cloud Companion: Direct Connection, LAN Connection, and Cloud Connection.
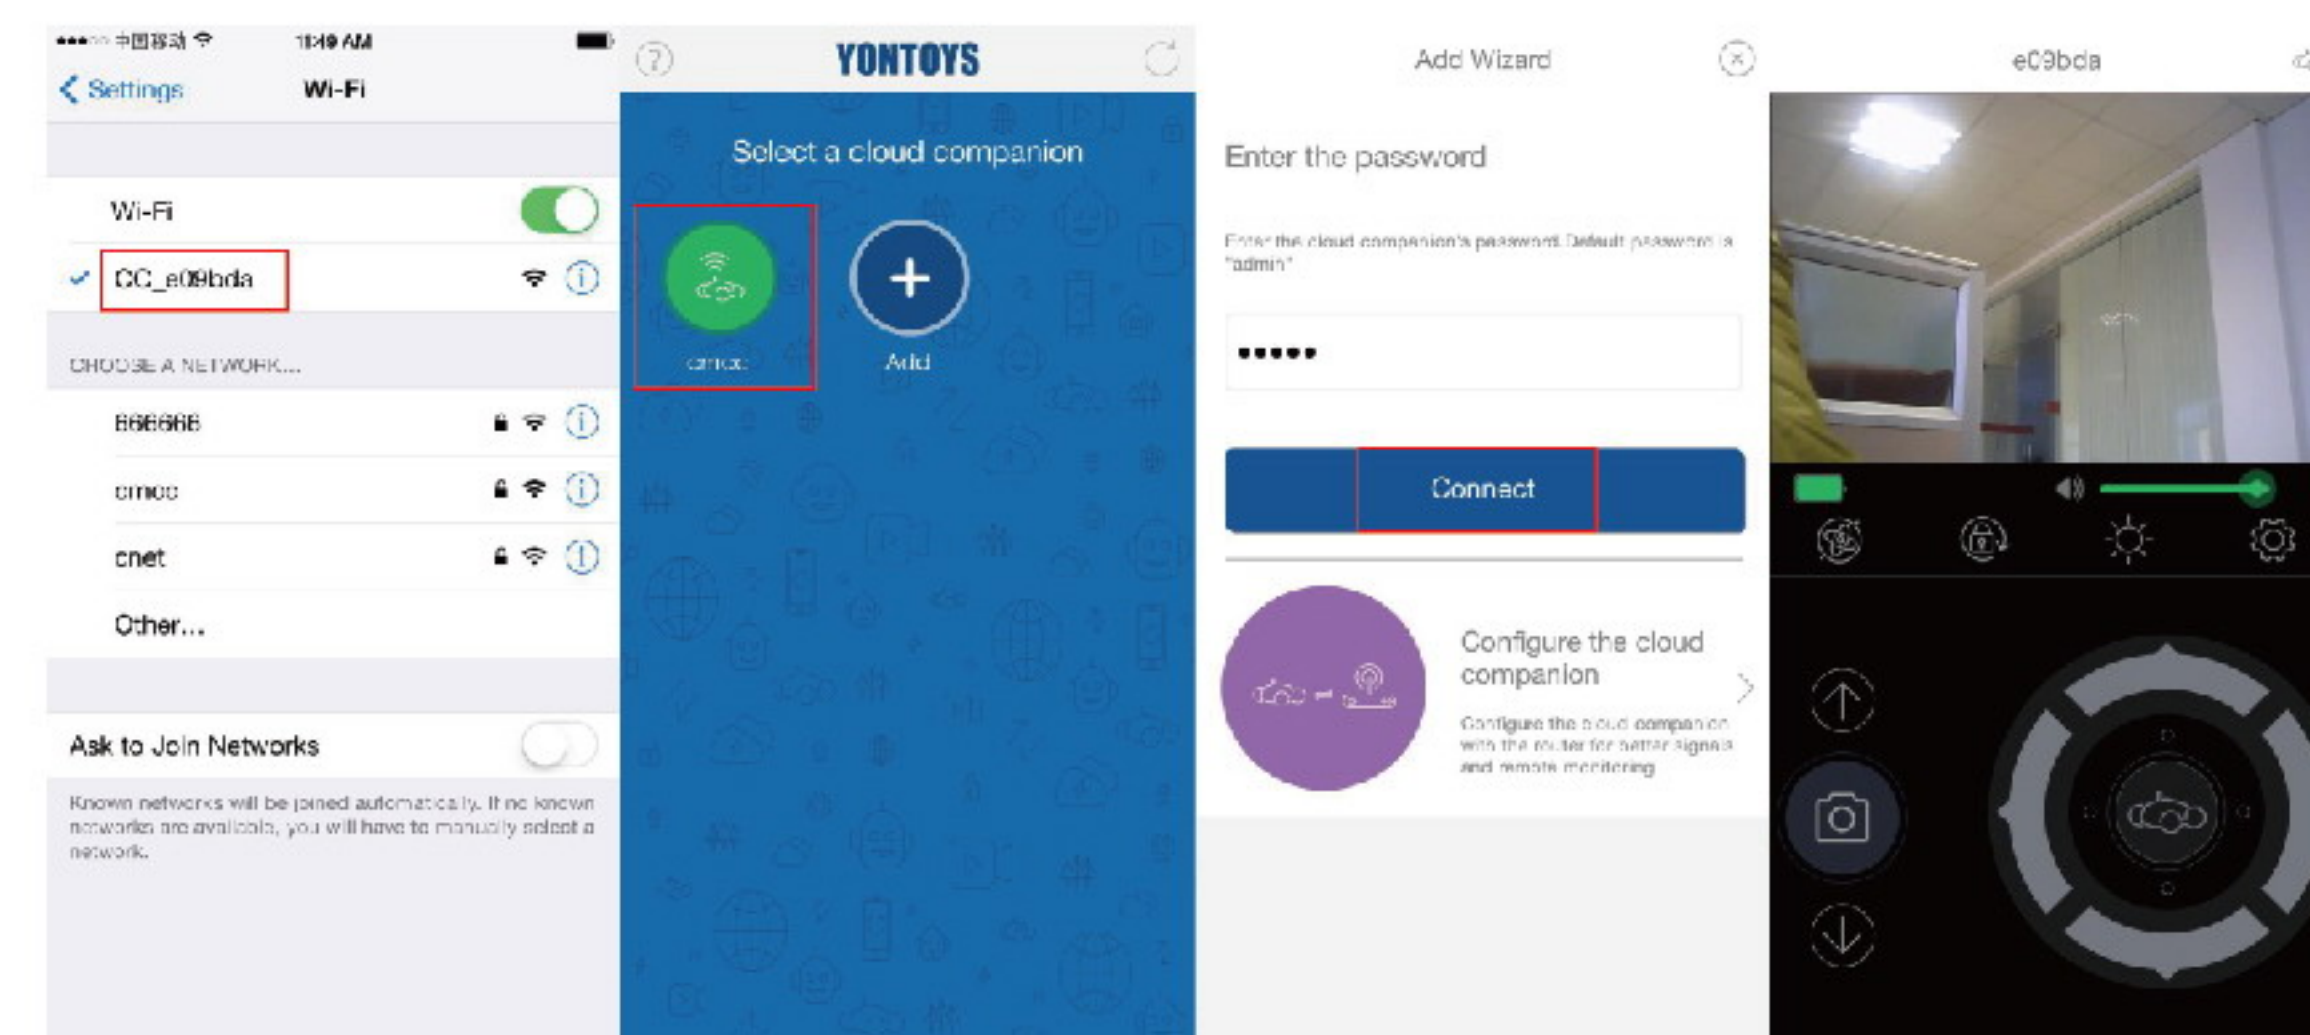

1. Direct Connection

Step 1: Turn on the power switch of Cloud Companion at the bottom of the car, wait about 30 seconds for it to start up and get ready for operation.
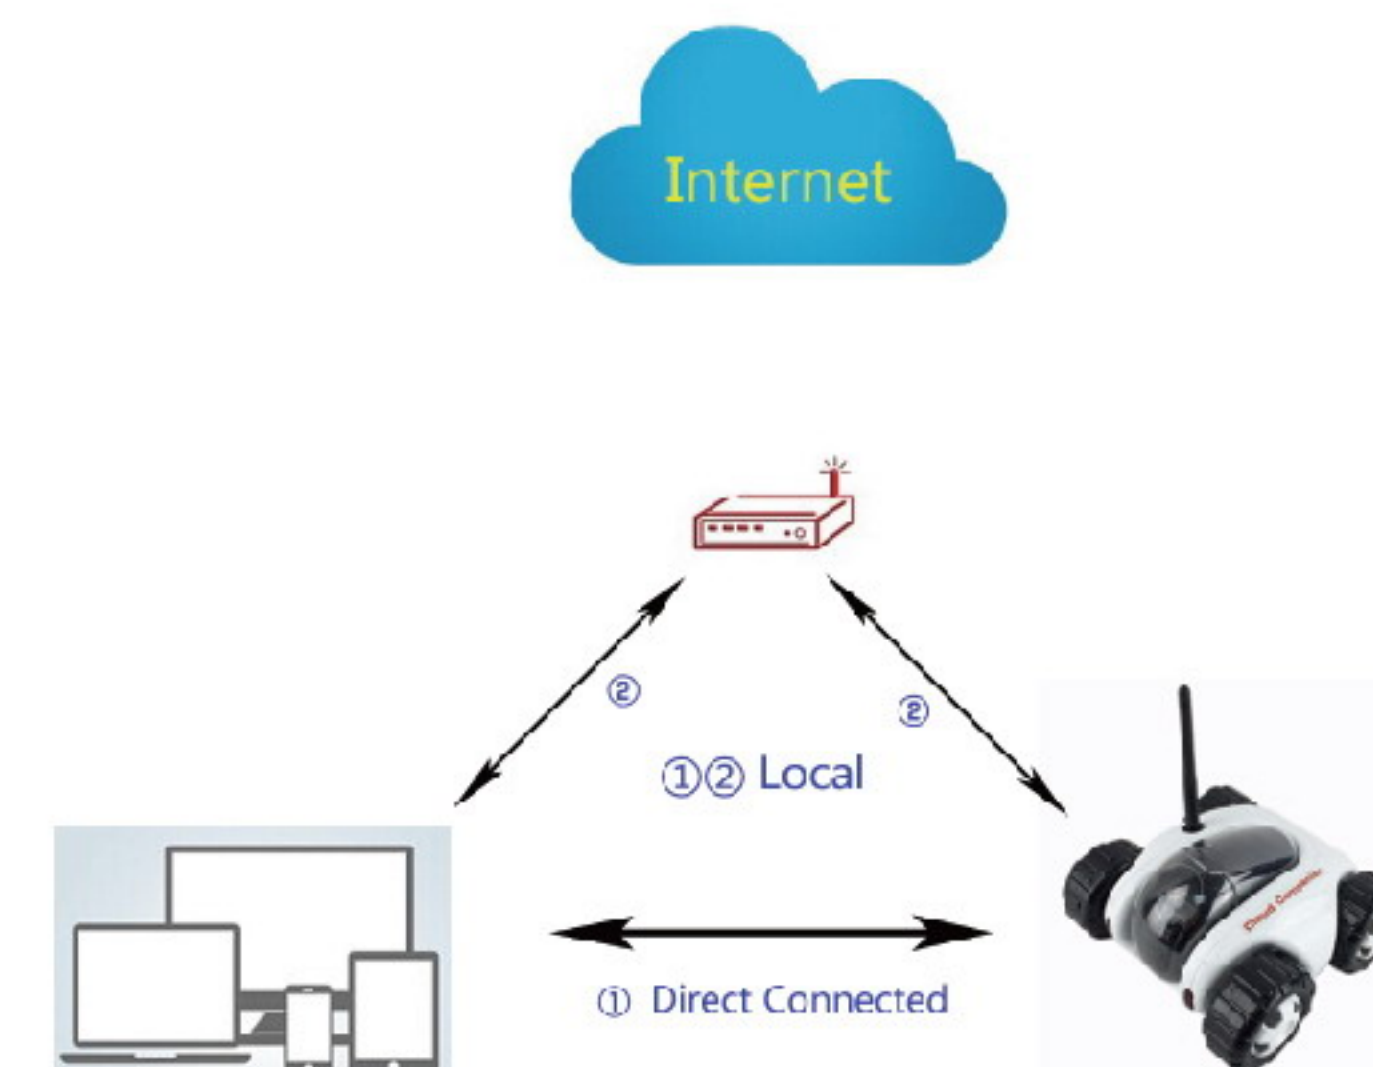

Step 2: Turn on the Wi-Fi on your smart phone or iPad.

Step 3: Select the SSID of Cloud Companion and connect. The general SSID is "CC_"+ 6 figures.

Step 4: Open the CloudCompanion APP, select your Cloud Companion to enter the operational interface. Green icons represent Local Cloud Companion.

2. Router Connection / LAN Connection

In the router/LAN connection mode, both the Cloud Companion and your devices are connected to a same router. Your smart device connects the Cloud Companion through the router. There are two easy ways to connect your Cloud Companion with the router.
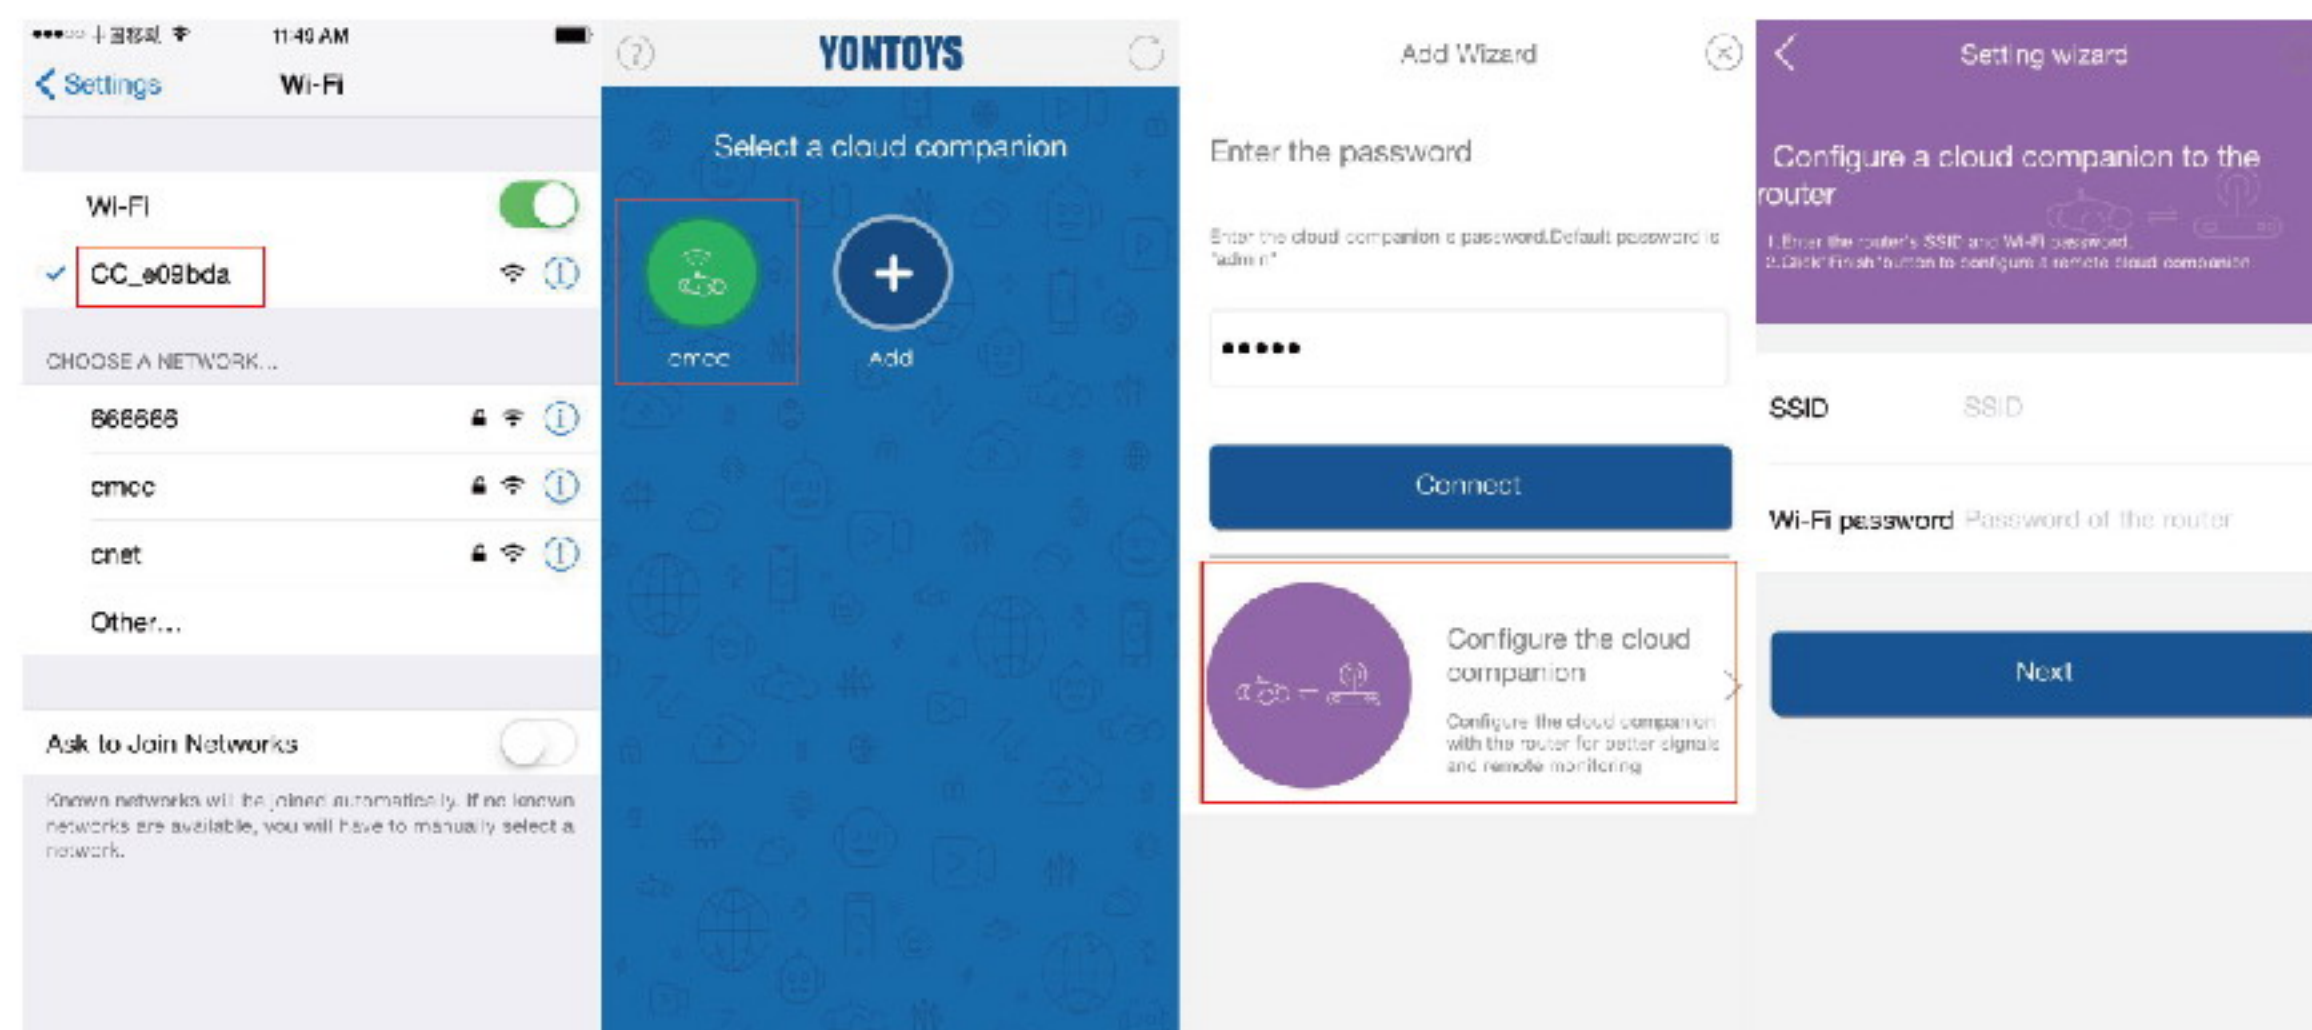

Method 1: When the Cloud Companion is directly connected to your smart devices, you can easily follow the following steps to connect the Cloud Companion with the router by putting the SSID and password of the router into the Cloud Companion.

Step 1: When smart phone is connected to your Cloud Companion via Wi-Fi, open the APP and click your Cloud Companion's icon.

Step 2: Put in the password of your Cloud Companion. Initial password is "admin". Click the below purple area to enter the setting page.

Step 3: Enter the router's SSID and the Wi-Fi password and click the "Next" button.

Step 4: Connect your Smart phone to the router Wi-Fi. Then enter the APP, you can find the named Cloud Companion in the local list.

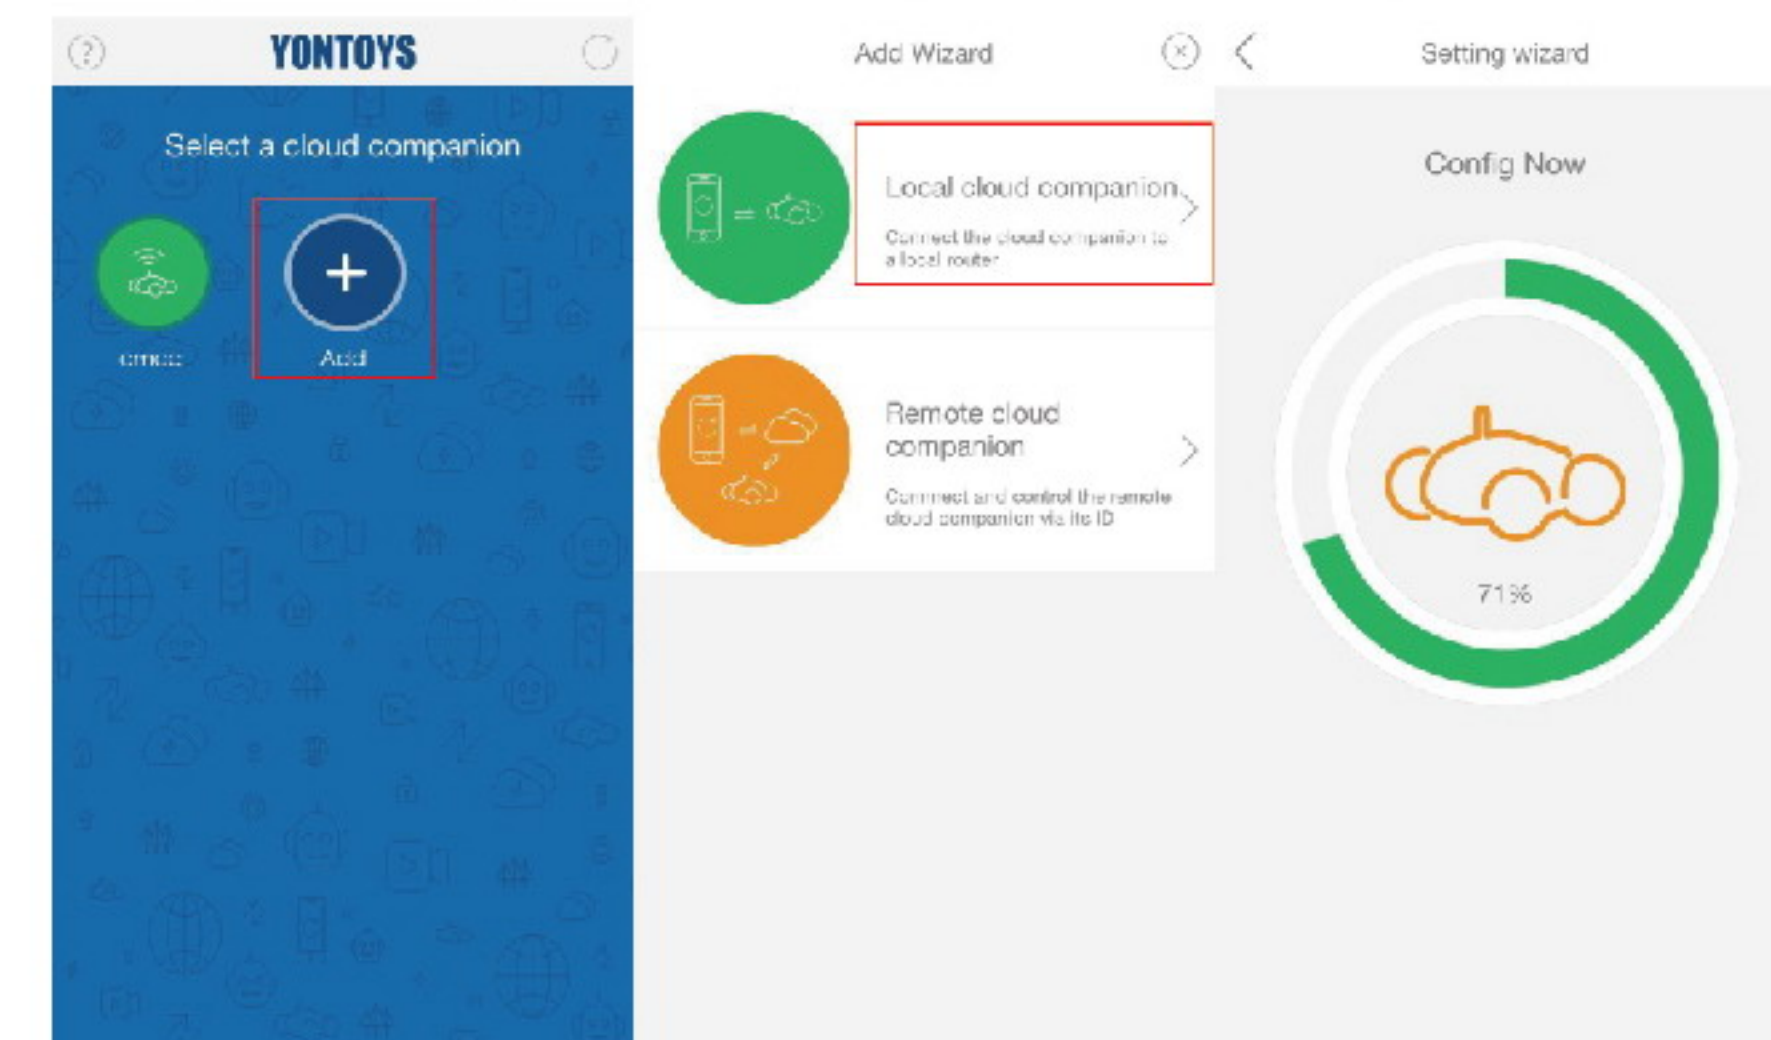

Method 2: Easy Configure

Step 1: When smart phone is connected to the router, open the APP, then click the "Add" button.

Step 2: Select the local Cloud Companion on Add Wizard page. In the Easy Configure mode, smart phone will automatically get the router's SSID. You only need to name your Cloud Companion and input the router password.
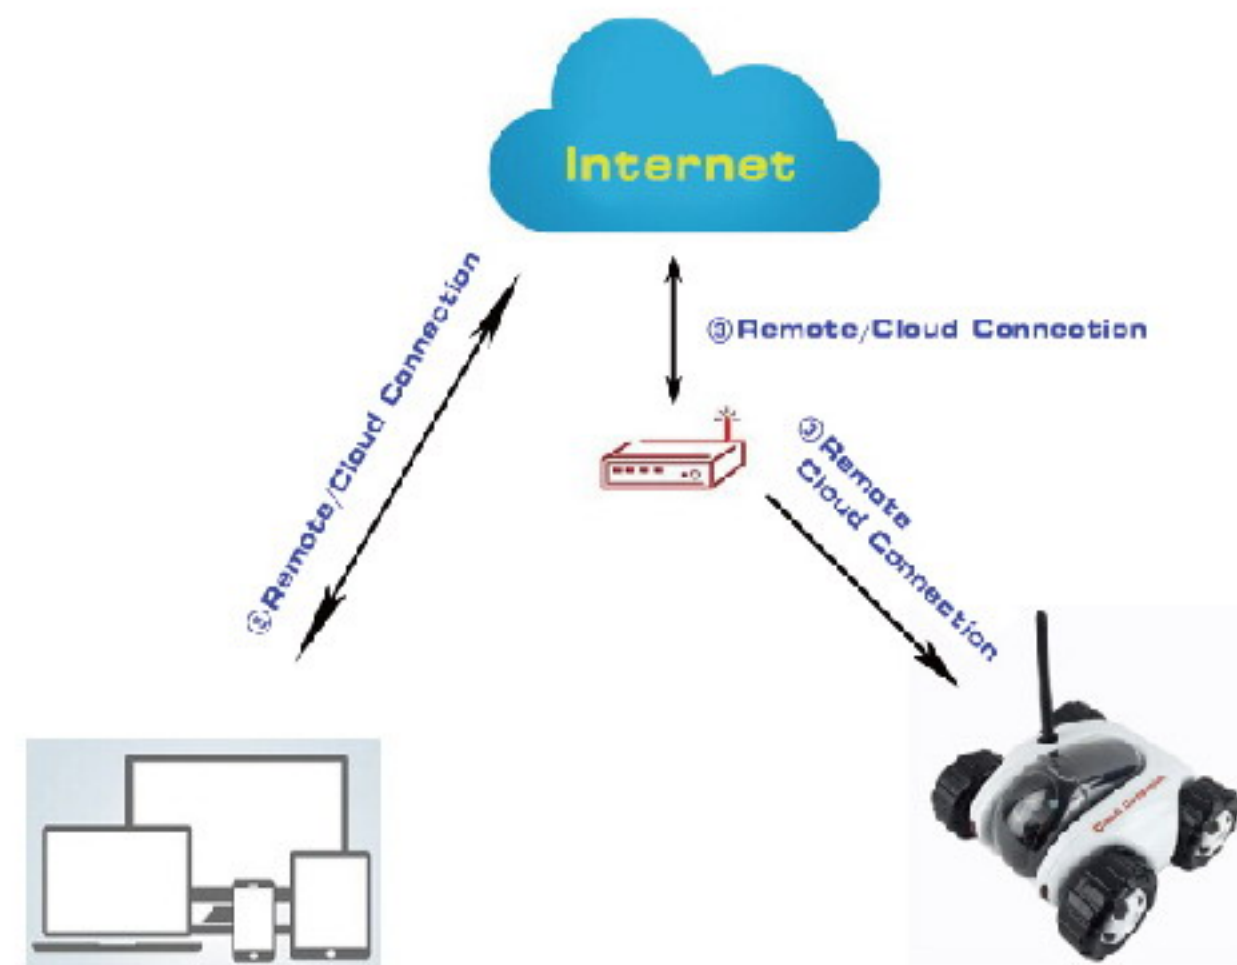

Step 3: Click the "Next" button. Then press the "Reset" button at the bottom of the car. The car will easy-configure with your smart phone.

Note: Please make sure to turn on the Cloud Companion for more than 30 seconds and let it boot into the standby state before setting easy-configure. Re-enter the "Choose Cloud Companion" page, find the newly added Cloud Companion to control.

3. Cloud Connection / Remote Connection (Smart phone is connected to the internet to remote control a Cloud Companion which is connected to the Internet via a router.)

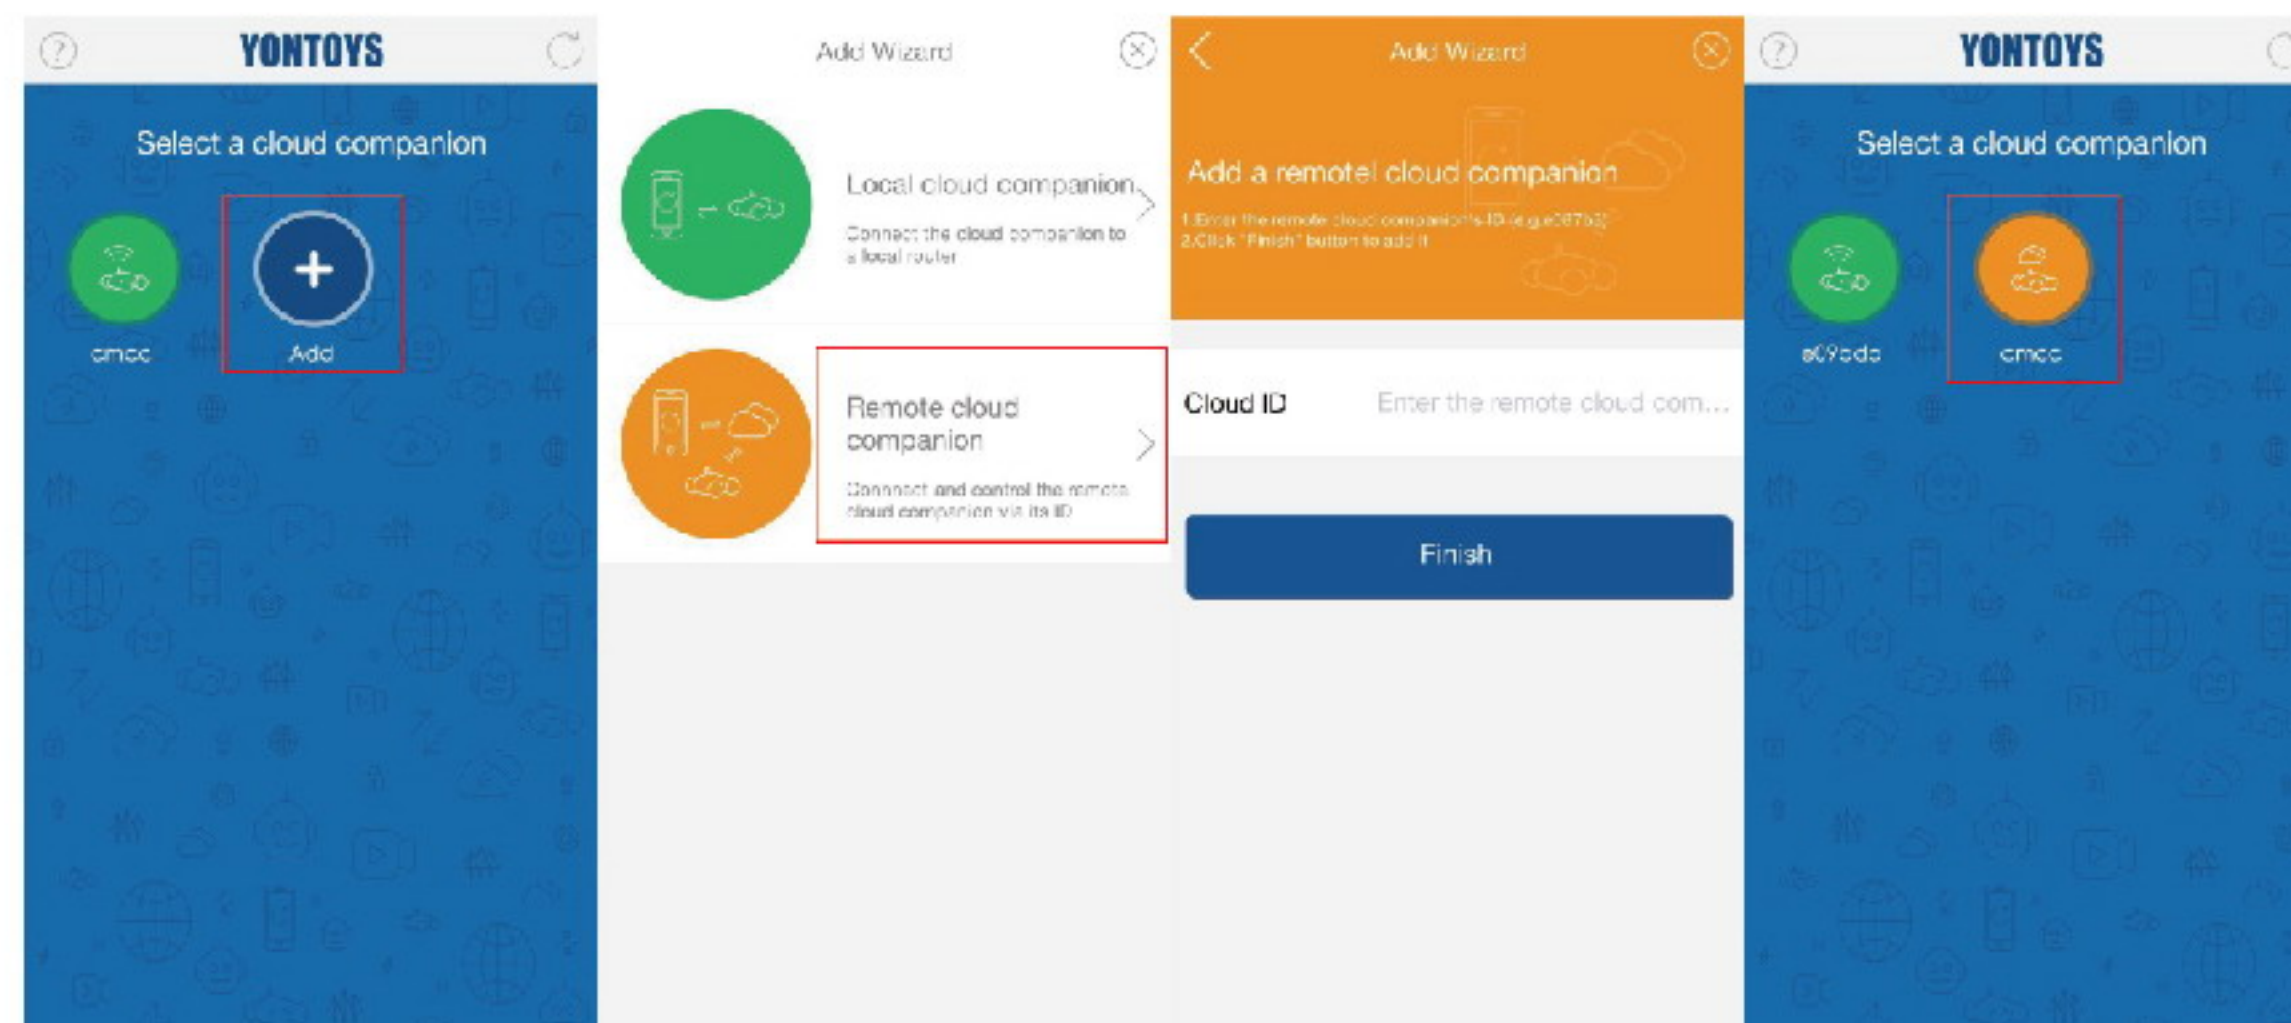

Add a new Cloud Companion

Step 1: Open the APP, click the Add "+" button

Step 2: Enter the Cloud Companion's NABTO ID (e.g., e087b3). You can long-press the icon of your Cloud Companion to copy its NABTO ID.
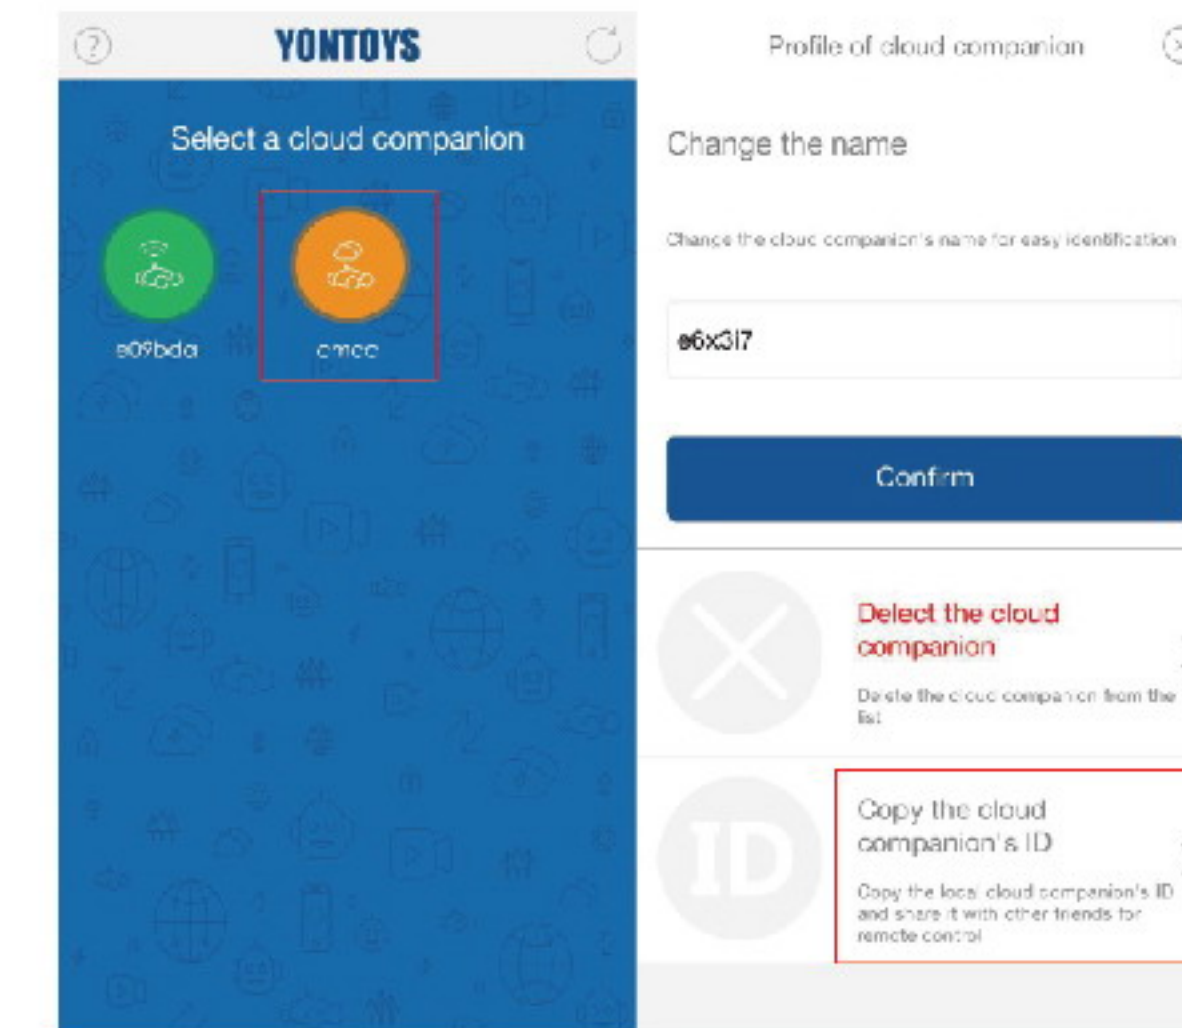

Step 3: Back to the front page. You can see the newly added Cloud Companion's ID in the remote Cloud Companion list, click it to start control.

Note: On the "Choose Cloud Companion" page, the green icon represents the local Cloud Companion (including the Cloud Companion in direct connection mode or the LAN mode). The orange icon shows the remote Cloud Companion. When a smart phone or a iPad is connected to the internet, it can access the Cloud Companion that is connected to the Internet via the router.

Note: Steps of copying NABTO ID of the Cloud Companion.

Step 1: You can long-press the icon of your Cloud Companion to copy its NABTO ID.

Step 2: Press to copy the NABTO ID.

Note: You must put in the password of Cloud Companion before entering the operational interface.

Note: It is recommended to choose the router connection mode when you are in a place with Wi-Fi. Cloud Companion's control range in this mode is wider than that in the direct connection.If the APP software can not activate your car, please check whether the power switch is on or the Cloud Companion is connected to the Wi-Fi. If yes, please quit the APP, and run it again.

CHARGING BATTERY

1. STANDARD VERSION
* 1. Turn "OFF" the car's power switch (Recommended).
* 2. Connect the USB cable with AC Adapter. Charging
     time is 4-5 Hours.
Warning: Using OTHER USB cable or equipment to
         charge the car may lengthen the charging
         time and cause damage to the product.
* 3. The rear light will be flashing when the car is on
     charging.
* 4. When the battery is full, the rear light will stop
     flashing and all light up.

2. WIRELESS CHARGING VERSION

Place the wireless charging pad at the specific location shown on the bottom of the box. Connect the wireless charging pad to a power outlet, and then drive the car onto the charging pad to start charging.

When the wireless charging pad is connected to power, the red light on the pad will be on for 2 seconds and then go out. If the red light is not on, then it means the wireless charging pad is not powered. If the red light keeps flashing, then it means your charger doesn't achieve 1.5A continuous output current. Please change for a power source of 5V, 1.5A and upwards.

When the car is staying at the proper location and the charging pad is working, the red light on the charging pad will go on, indicating the car is in charging

Note: 1. Only charge the battery with its original charger and cable. 2. Do Not remove the Cloud Companion built-in battery, otherwise the car will be broken.

Take Photos & Videos
The vehicle can take photos and record videos while driving. The recordings will be saved as files in your smart device.

Photographing
Press the "Camera" button to take a snapshot.

Long press the "Camera" button to start video recording, press again to stop and save the video.

Note: The photo quantity or the video length and quantity depend on the memory capacity of your smart device.

Safety Warning

1. Immediately change the initial password upon the Cloud Companion's connection with the router, or your Cloud Companion may be controlled by others.
2. Do not take the Cloud Companion built-in battery out of the car.
3. Recharge the car under adult supervision.
4. Turn the car "OFF" before cleaning. Clean the car with a soft, dry cloth. Do not put the car into water.
5. Timely clean hairs or lint caught on the rear or front wheels.
6. When the battery power is low, the car's signal become weak. Please charge the battery in time.
7. Please comply with local law and properly use this product.
